The presentation slide features a header with the Greek flag and the HERA logo. Below the header is a 3D architectural rendering of a city. A blue button in the center reads "Συμμετέχετε στην πρόβλεψη". The main content area contains three event cards:

- HERA MULTIPLIER EVENT**  
Multiplier Event
- Hera Multiplier Showcase**  
Showcase
- Using the TUTORIAL Scenario**  
Tutorial course

At the bottom of the slide, there is a navigation bar with "Previous" and "Next" buttons.

**Covid 19 City**  
In this scenario the players are dealing with the current problem of the widespread of the virus (Covid 19). During their playtime they have to take the health, financial and happiness factor in mind, and build, destroy and change their town to boost these factors. The health has the most importance of the three. It's important that the players provide health coverage and boost their citizens sense of safety. At the same time, the happiness is always a major component of success, as well as the economic stability since a sudden crash will have a financial cost.

**e-Commerce simulator**  
e-Commerce has been gaining momentum and market share over the past decades. In the COVID-19 era, e-Commerce has emerged as a viable option for ensuring the continuation of economic activity. Supporting e-Commerce relies on low-latency operational costs, fast internet connections and information technology infrastructure, energy infrastructure, and a healthy economy that supports consumer spending. All of these can lead to increased economic activity that ultimately leads to better quality of life. This activity simulates the design of a city in which e-Commerce can thrive as a result of effective urban design and quality of life. Students are challenged to design a city that has sound infrastructure, which may include economic facilities in both high and low cost areas for supporting high-growth based on low operational costs, energy networks, internet service providers, and an urban design that provides quality of life through the inclusion of various related to education, culture, health, and safety.

PAAs: [Environment, Agriculture, Transport](#) [Education, Employment](#) [Environment, Employment](#) [Agriculture](#)

### Massive City Number Two

PAAs: [Safe City](#) [Safe Team](#) [Safe Theme](#)

### MYFLOOD

The strategic flood masterplan - ecosystem services as cost-effective way to tackle climate change in urban environment. Overall goal: ensure the water supply and wastewater treatment for the population and help the city to deal with extreme rain events and flash floods. Extreme weather resulting in flooding and damaging the infrastructure is expected to be a significant long term risk associated with climate change. In our cities, there is much less opportunity for rainwater to infiltrate naturally into the ground because of the amount of hard surfaces such as roofs, roads, footpaths and driveways. This results in large volumes of surface water during heavy rainfall which will put pressure on existing drains and sewers, and lead to flooding and pollution. Thus, there is a need to identify, and then implement, ways to rehabilitate urban ecosystems.

PAAs: [City management](#) [ESU of the water company](#) [Safety inspector](#)

### Olympic village 1.93

The next Olympic Games come to our city. We are responsible for building the needed sports facilities, infrastructure and accommodation for the event. The new area should also have commercial areas, public services and everything needed to make it functional and enjoyable.

PAAs: [Private facilities](#) [Public facilities](#) [Contents and commerce manager](#) [Energy and pollution control manager](#)
